

2009-2013 Transportation Improvements Program

for the

Sioux Falls Metropolitan Area

Prepared By:

The City of Sioux Falls, Minnehaha County,
Lincoln County, South Eastern Council of Governments,
Sioux Falls Regional Airport Authority, and the
South Dakota Department of Transportation

In Cooperation With:

The Federal Highway Administration
and the Federal Transit Administration of the
United States Department of Transportation

Adopted By:

The Urbanized Development Commission
of the Sioux Falls Metropolitan
Transportation Planning Process

The 2009-2013 Transportation Improvements Program

The 2009-2013 Sioux Falls Metropolitan Area Transportation Improvements Program (TIP) represents a prioritized program of transportation improvements in the following multi-modal areas: streets and highways, public transportation, aviation, railroads, bicycles, and pedestrian. Projects are prioritized within each program year by funding category.

The Sioux Falls TIP is developed jointly by the South Dakota Department of Transportation (SDDOT), the local participating units of government, agencies, and the committees of the Metropolitan Planning Organization (MPO). The development of the TIP is a result of a series of meetings between state and local transportation officials in which the transportation-related needs, concerns, and priorities of each participant are discussed and evaluated. Project-oriented solutions have been developed and initiated into the TIP by the governmental entity having jurisdiction.

The TIP is a compilation of projects extracted from plans of the units of government and other agencies participating in the local transportation planning process. State projects included within the TIP are also found in SDDOT's Statewide Transportation Improvement Program (STIP). The projects identified in the STIP have been prioritized based on overall needs at the State level and the availability of funds for each the regions in South Dakota. The South Dakota Transportation Commission approves the STIP after the MPO acts on the TIP.

Projects located within the City of Sioux Falls are drawn from the City's Capital Improvements Program (CIP). County projects are developed internally and funding sources are included in the annual provisional budget for the Highway Departments.

The improvement projects listed in the TIP must conform to the Long Range Transportation Plan (LRTP) for the Sioux Falls metropolitan area. The most recent LRTP was approved in 2005. Currently, projects within the TIP are considered to be in compliance with the LRTP. In addition to LRTP conformity, projects listed within the TIP also conform to a broad set of considerations identified in the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). The eight considerations found in SAFETEA-LU include:

- Support the economic vitality of the metropolitan area by enabling global competitiveness, productivity, and efficiency;
- Increase the safety and security of the transportation system for motorized and non-motorized users;
- Increase the ability of the transportation system to support homeland security and safeguard the personal security of all motorized and non-motorized users;
- Increase the accessibility and mobility options available to people and freight;

- Protect and enhance the environment, promote energy conservation, and improve quality of life;
- Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;
- Promote efficient system management and operation; and
- Emphasize the preservation of the existing transportation system.

In accordance with 23 CFR 450.334, the SDDOT and Sioux Falls MPO for the Sioux Falls, South Dakota metropolitan planning area have certified that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable state and federal requirements. A copy of the signed certification statement is attached in the Appendix.

Financial Constraint Affirmation

SAFETEA-LU requires that all TIPs be financially constrained and include a financial plan that indicates how projects can be implemented while the existing transportation system is being adequately operated and maintained using existing or expected revenues. The Sioux Falls area TIP has been developed to be financially constrained for each of the five years. A general breakdown of cost estimates for each calendar year has been tabulated to provide total anticipated expenditures. Additional information regarding SDDOT funding levels can be found in Figure 4.

All projects sponsored by the City of Sioux Falls are excerpted from the City's CIP and Other Capital Expenditures Plan (OCEP), as required by the City Charter. The CIP is a five-year plan for construction and infrastructure improvements. A committee is utilized to develop and administer the plan.

The five-year CIP plan is revised and updated annually. The revision process includes the department directors submitting a list of requests spanning a five-year period to the CIP Committee. The Committee reviews the requests and conducts hearings with each director. After presentations by the directors, the Committee formulates the five-year plan based on the results of the hearings, on available funding, and on priorities. The CIP plan is finally presented to the Mayor.

The OCEP planning process was established by an executive order which includes the following six requirements:

1. Provide standardization of the capital inventory;
2. Provide level funding;
3. Provide a long-range plan;
4. Ensure that equipment is utilized to its full life;
5. Provide adequate, but not unnecessary, equipment; and
6. Monitor adherence to the Capital Improvements Plan.

The directors of the major organizational units within the City update their OCEPs annually. The Mayor presents the OCEP, along with the CIP for construction improvements, to the City Council. A public hearing is held on the CIP prior to adoption by resolution. The Council must adopt the Capital Improvements Program.

The City has identified the following nine funding sources as part of the CIP planning process:

1. **Assessments (Special)**—cost recoveries that are levied against real property based upon the cost of improvements made by the City.
2. **Bond Funds**—funds derived from the issuance of general obligation or revenue bonds by the City. These bonds constitute an obligation of the City to repay principal and interest over a specified number of years from general or other revenues of the City.
3. **Enterprise Assessments**—cost recoveries that are levied against real property based upon the cost of improvement by the City. These costs are levied within a specific enterprise fund (water, wastewater, landfill, etc.).
4. **Federal Funds**—grants or loans from the federal government, which are required to be used for specific purposes or projects.
5. **General Fund**—the fund used to account for all financial resources, except those required to be accounted for in another fund. The City's general fund accounts for revenues and expenditures of general property taxes, first penny sales tax, licenses and permits, etc.
6. **Other Funds**—special revenue or trust funds that account for revenues that are restricted for specific purposes.
7. **State Funds**—grants or loans from the State of South Dakota for specific purposes or projects.
8. **Sales Tax (2nd Penny)**—an additional one percent tax levied on gross receipts of retail business and service within the City's jurisdiction that may be used for specific purposes, primarily capital improvement projects and debt retirement.
9. **User Fees**—fees charged for goods and services to recover the costs associated with providing those goods and services.

Projects programmed for the upcoming year (2009) will be adopted as a part of the City budget. Projects scheduled for subsequent years (2010-2013) are tentatively programmed for implementation in those respective years. All projects beyond the current year are subject to future annual review.

Over 207 million is scheduled to finance the City's CIP during the next five years. Over half of the funds budgeted will be invested on street, infrastructure, and utility

improvements. Expanded use of the one-percent capital improvement sales tax will finance not only street and related utility improvements, but also serve several projects designed to improve the quality of life in Sioux Falls.

The following table depicts the projected annual construction totals for the City of Sioux Falls' portion of the TIP.

Figure 1 - City of Sioux Falls Projected 5-Year TIP Total Expenditures

Year	Proposed Expenditures
2009	\$65,537,012
2010	\$46,804,483
2011	\$24,359,205
2012	\$35,962,547
2013	\$35,065,165
Total	\$207,728,412

As stated previously, the City of Sioux Falls utilizes several revenue sources for the CIP and the TIP. The proposed funding sources for the City's portion of the 2009-2013 TIP are listed in the table below.

Figure 2 - City of Sioux Falls Projected Funding Sources

Fund	2009	2010	2011	2012	2013	Total
Bond Funds	\$0	\$13,594,500	\$0	\$2,950,000	\$0	\$16,544,500

Funding for Minnehaha and Lincoln Counties' annual provisional budgets include the following sources: Wheel Tax, Intergovernmental Revenue, Charges for Goods & Services, and Miscellaneous Revenue. There are no federally funded projects provided by Lincoln County or Minnehaha County within the MPO that are to be included in the TIP. If future projects are presented, Minnehaha County has committed funds to the County Secondary and Off System Projects (SDDOT) listed within this TIP. All local match shall be derived from the Minnehaha County Road and Bridge fund and will include local match dollars for both 2007 and 2008.

Figures 3 illustrates the STP and RSI funded projects in Sioux Falls, along with the amount of State funding levels for the MPO area.

Figure 3 – STP and RSI Funded Projects

State Project Number	CIP Project Number	Project Description	Programmed Year(s) for Expenditures	Type of Funding	Amount
IM-EM 0909(68)396 P 1423(04)	305099	Marion Rd, Construct 4-Lane W/ Median, Grading, Storm Sewer, C&G, Surfacing, ROW & Lighting; Lighting at Exit #390 (Hartford); Construction of Ramps for Marion Rd Interchange; Construct 5-Lane Urban Section, Grading, Storm Sewer, C&G, Surfacing, ROW, & Lighting	2009	STP	\$2,654,000
P 1157(01)	339099	ROW, Utilities and Preliminary Engineering	2009	STP	\$615,000
PH 2042(02)	151014	Add Additional Left-Turn Lanes on All Legs of Intersection	2010	RSI	\$450,000
PH 0042(27)369 PH 1400 (10)	449099	Arrowhead Pkwy (Old SD42) & Sycamore – Widen for Additional Left Turn Lane on S & W Legs of the Intersection; Western & 41 st St. – Install Right Turn Lane EB to SB and WB to NB, Widen S Leg for Additional Left Turn Lane	2010	RSI	\$1,338,000
Total					\$5,057,000

The following table depicts the projected annual construction totals for the federally funded projects, and the entity responsible for paying the match. State match is funded from the State Highway Trust Fund. The State Highway Trust Fund generates most of its revenue from the state gas tax. Local match is funded from the sources shown in Figure 2.

Figure 4- Federally Funded Projects in the Metropolitan Planning Area

State Projects	2009	2010	2011	2012	2013	Total

Amendments

The TIP is developed on an annual basis and spans a consecutive five-year period. Each subsequent TIP advances the program horizon by one year. Occasionally, some projects are not able to proceed in the noted timeframe due to changes in project development activities such as public hearings or Environmental Impact Statements, changes in implementation priorities, or other unknown factors at the time the TIP is prepared.

To accommodate unforeseen changes, projects reflected in any of the first four years of the approved TIP may be advanced for federal fund commitment without requiring an amendment to the TIP. In the event a new project is identified for inclusion in the TIP prior to the annual adoption procedure, the MPO will follow the public hearing and committee review process as outlined in the *Operations Plan*.

Public Participation

The Sioux Falls MPO has adopted a *Public Participation Program* and an *Operations Plan* that prescribe measures to allow ample opportunity for public participation throughout the adoption process of the TIP. A series of public hearings are scheduled to allow the public to comment on the TIP. Also, the City of Sioux Falls undergoes a rigorous process during review and approval of the CIP, as indicated in the *Financial Constraint Affirmation* section of this document.

Public comments on the TIP are solicited through the use of press releases and publication of legal notices. Significant public comment on all plans, programs or individual projects received prior to final approval of the TIP may merit additional public hearings or reconsideration by the participating agencies. The MPO also maintains minutes of all public hearings, which are available upon request by interested groups or citizens. Additionally, as required by 23 CFR 316(b)(1)(vii), when significant oral or written comments are received on the TIP, a summary of those comments and how they were addressed will be included in an appendix to the final document. Also attached is a copy of the Public Participation Plan that was prepared specifically for the 2009-2013 TIP.

2009-2013 TIP Project Listing

The 2009-2013 TIP for the Sioux Falls metropolitan planning area represents a five-year listing of fiscally constrained, prioritized transportation improvements. The following sections provide a year-by-year description of the proposed improvements. The project descriptions include the project source, project numbers (specific to initiating entity), route number (SDDOT projects only), length of project (SDDOT and county projects), project location, type of improvement, year of project letting, and funding summary. The ¥ symbol indicates that costs reflect anticipated inflation. The project descriptions are listed by priority within their specific funding source. The City of Sioux Falls' CIP projects are prioritized according to departmental needs. The State of South Dakota projects are prioritized according to statewide needs.

2009 TIP

Priority within Funding Source	Project Number	PCN	County	Length (miles)	Route	Location of Project	Type of Improvement	Federal Funds¥	Total Cost¥
