Addendum No. 2

RFP No. 16-0105

RFP for Professional Design Service3s for Falls Park West and Levitt Shell Improvements

Answers to questions:

1) Reference is made in p.21 to Levitt standards for sound systems. Could you provide those standards?

The sound and light equipment will be provided by the local Friends of Levitt non-profit group. The specifics of the sound and light equipment may be discussed during the design process, but will not supplied as a part of the project.

For the purpose of generating proposals, the following description outlines the Levitt Foundations' expectations for the sound and lighting equipment.

All outdoor Levitt music venues have state-of-the-art, professional grade sound and lighting equipment reflecting the high standards of the Levitt program. The venue sound system should be designed according to anticipated maximum audience size at the site, while mitigating sound flow to the venue's nearby surroundings, including residences, businesses and other facilities. The sound system inventory should include typical equipment for a professional outdoor venue presenting bands of various sizes, with speaker inventory specific to the site. The lighting system inventory should be based on venue design.

Sign this form and return with your proposal, or you may fax this form to (605) 367-8016.

Do not fax your bid price.
