The Medical Board discussed 12 lead EKG implementation at SFFR. They are completing training soon. They won’t have transmission capability until some time after April 2011. The board members discussed how best to get the correct 12 leads to the correct hospital. Consensus was that for now SFFR will give 12 leads that they have performed to R/M paramedics who will decide whether to transmit and where. Review for quality was also discussed. Jim will make sure that the computer interpretation will be turned off on all Lifepacks because it cannot be relied on. Jim will pull all SFFR 12 leads and they will be reviewed monthly along with the cardiac arrest reviews that are currently done. The number done and the number reviewed, along with findings, will be reported to the Medical Board.
