**MINNESOTA AVENUE IMPROVEMENTS**

Project Update

*The City of Sioux Falls is planning to reconstruct Minnesota Avenue from Russell Street to 18th Street.*

This project will transform Minnesota Avenue into a lively, secure, distinctive corridor that better serves the community and all who visit.

**PROJECT NEEDS**

- Update aging water main and infrastructure
- More lighting for increased safety
- Updated and consolidated access
- Enhanced aesthetics: trees, benches and new bus stops

**Final design in 2020 and anticipated construction in 2021**

MINNESOTA AVENUE IMPROVEMENTS

Watch for Public Input Opportunities in 2020

Reconstruction will update aging infrastructure including the water main, utilities, and traffic control. This project gives us the opportunity to include additional lighting for increased safety and elevate the visual appeal and artistic integration which has become the hallmark of downtown Sioux Falls.

As we prepare for this project, we want to engage residents and visitors to Minnesota Avenue in the process. Construction will happen in phases—one segment of the corridor at a time, with Phase 1 anticipated to begin in 2021.

WE WANT YOUR INPUT

Public Input Meetings
Watch for notifications of public input meetings to be held in the Spring of 2020 where you will be able to view project plans and give feedback to our planning team.
