Purpose:
The City of Sioux Falls Office of Public Works is offering this service to businesses as part of its Business Hazardous Waste Management Program. Businesses that are classified as a Very Small Quantity Generator (VSQG) under the state’s hazardous waste regulations, which adopt by reference the federal hazardous regulations under RCRA Subtitle C, are eligible. The goal of the program is to assist small businesses by providing an environmentally friendly way to manage their hazardous wastes while reducing or eliminating the disposal of these hazardous wastes to the City’s sanitary sewer system, City’s regional sanitary landfill, or the environment.

Businesses who generate more than 1 kg (2.2 lbs) of acutely hazardous waste and/or more than 100 kg (220 lbs) of toxic hazardous waste in a calendar month are not eligible for this program as they are not regulated as VSQGs.

By signing this document, the generator verifies that they meet VSQG requirements and are eligible to participate in this City-funded program.
