RE: Recycling for Sioux Falls Residents

Dear Sioux Falls Resident,

This year we are asking everyone to take a moment and make a positive impact by recycling.

We appreciate all you have done to make recycling successful in our community. Recycling extends the life of the Sioux Falls Regional Sanitary Landfill and helps us create a sustainable future. Not only does recycling save everyone money by saving valuable metals, paper and other items from the landfill, but it creates additional jobs and saves natural resources.

We are writing everyone to remind our community that waste haulers are required per Chapter 57 of the Sioux Falls Ordinances to offer recycling to their customers.

Sioux Falls has a single-stream recycling system which means paper, cardboard, plastic tubs and jugs, and metal cans can be placed in the same recycling bin. It is very important to recycle these materials, and not mix them in with the trash. A waste hauler can reject your trash bin for collection or recycling if either has too many incorrect items inside.

The City has launched an educational campaign called 'It's Easy to Make an Impact' to help residents and businesses recycle as much as possible. The campaign focuses on the impact every individual has on our community. As part of the Impact campaign, there are materials to help you recycle. The updated recycling guide is included in this letter, but I encourage you to check out SiouxFalls.org/Recycle and use some of our other resources including information about how to properly dispose of batteries, electronics, household hazardous waste and yard waste. We also frequently post recycling tips and information about 'going green' in Sioux Falls on our social media pages: Twitter- @sfleadinggreen and Facebook- Sioux Falls Leading Green.

It's easy to make an impact every day by recycling the correct items. Successfully recycling will have a long-lasting positive impact on our community and infrastructure.

If you have any questions about the campaign, please visit SiouxFalls.org/Recycle. If you have questions about recycling or waste ordinances, please call the Landfill at (605) 367-8162.

Feel free to reach out to us any time for more information or assistance in making your recycling goals a reality.

Sincerely,

Jessica Sexe
Sustainability Coordinator
